

Quantum Interface Technology (QIT) Definitions

Quantum Energy Transformer – A **Quantum Current** (I_Q) *device* that causes the **MC** to release I_Q . These *devices* can be used to generate non-physical energy (NPE).

Holographic Recharging System – A combination of **Quantum Energy Transformers** - that work in concert to keep an environment **fully charged**.

Quantum Hologram Recharger (QHR) – A specific **Quantum Energy transformer** that provides **Quantum Current** (I_Q) to restore the **Holograms** of Earthling Human Beings (EHB).

device - A physical construction that accomplishes a manipulation of the **MC**.

system - A group of physical constructs or *devices* that work together to accomplish a manipulation of the **MC**.

technology - Hardware that interacts with or controls the **Mind**, the **Holograms** or the **MC** for a desirable result.

Holographic Device Failure (DF)- The failure of a *device* caused by a the interaction with a being's **Holograms** or **Mind**.

living Systems - A system that includes the **Hologram** or Signal of living organisms.

Quantum Hologram Amplifier - A *device* that amplifies the **Signal of Life** or the **Hologram** of a living being. This can be a frequency change or a **Quantum Voltage** (V_Q) change.
